In this newly revised edition of *Understanding Research in Early Education*, Margaret Clark demonstrates the continuing relevance of research in the homes of young children and in preschool units. Through rigorous yet understandable language, the text stresses the importance of research, acknowledging how easy it can be, amidst the change and flood of documents on early education and care, to overlook the insights to be gained from past research. The author draws on her own studies, and those of others, to illustrate how to avoid common pitfalls, ask the right questions to inform students' research projects, and critically apply findings in the classroom or nursery. The book is one of the few texts for students to bring research alive, analysing key research to consider its limitations and the extent to which results are relevant to policy and practice. Without requiring any prior expertise in research and research methodologies, the third edition will prove invaluable for undergraduate and postgraduate students taking courses in early years' education, and practitioners undertaking continuing professional development.

New content includes: fully revised chapters, an updated reference list, and a new chapter discussing current research on baseline assessment.

Helgeland Anne, Lund Ingrid, Children's voices on bullying in kindergarten. Forskningsområdet ivaretar det nasjonale ansvaret NIFU har for produksjon, analyse og formidling av statistikk og indikatorer for det samlede

norske FoU-systemet. Laventhal, Naomi; Verhagen, Eduard; Hansen, Thor Willy Ruud; Dempsey, Eugene; Davis, Peter Graham; Musante, Gabriel; Wiles, Alison; Meadow, William. Helsearbeidet i Norge skal dreies fra kostbar, høyspesialisert behandling av syke til større vekt på helsefremmende og sykdomsforebyggende tiltak. Kartleggingsmetoder.

Kartlegging av søvn hos pasienter med Alzheimers sykdom vil kunne påvise søvnforstyrrelser, deres alvorlighetsgrad og mulige årsaker, og. De fleste nyutdannede førskolelærerne begynner umiddelbart etter fullført førskolelærerutdanning i stillinger som pedagogiske ledere, stillinger som gir dem.
